

Integrated Documentation

TECHNICAL PUBLICATIONS – Military & Commercial

Our specialist technical authors are familiar with most aspects of “state of the art” engineering practice. They are conversant with the strict requirements of the various military and commercial documentation specifications.

We can provide stand alone paper based documentation, interactive electronic documentation (CD-ROM) integrated documentation (CSDB) and web based documentation are all within the Company’s capabilities.

MILITARY

I-Doc’s multi-disciplined team are well versed in military documentation standards and can confidently meet the requirements of all three Services.

I-Doc retain a high level of technical and specialist staff (many of whom are ex-Service personnel). First class support facilities and the ability to achieve the highest standards of presentation and technical accuracy, ensure that I-Doc’s services are second to none.

We have over 40 years experience in the preparation of Technical Documentation encompassing:

- Army Equipment Support Publications (AESP)
- Air Technical Publications (AP)
- Naval Handbook (BR)
- Illustrated Parts Catalogue (IPC)
- Defence Standards
- Software Documentation

Our technical and specialist staff are experienced in all disciplines of authorship/documentation and have a sound knowledge of the formally recognised specifications which include:

- Army Equipment Support Publications (AESP) 0100-P-005-010
- AECMA 1000D
- AvP 70

Integrated Documentation

TECHNICAL PUBLICATIONS – Military & Commercial Continued ...

- DefStan 0060
- JSP 101, 110 and JSP 181 – 188
- NES 40

The engineering disciplines of our staff are uniquely employed to provide a full service, commencing with the familiarisation of the system/equipment, and the in-depth investigation of the required technical data, resulting in the preparation of the highly accurate documentation.

Technical Documentation can be prepared from manufacturer's drawings, and data sheets, or from the system/equipment itself.

COMMERCIAL

We have over 15 years experience in the preparation of Technical Documentation encompassing:

- Technical Specifications
- Installation Instructions
- Operating Procedures
- Preventative Maintenance
- Fault Diagnosis
- Maintenance/Overhaul Instructions
- Calibration/Test Procedures
- Illustrated Parts Catalogues

Our technical and specialist staff are experienced in all disciplines of authorship/documentation and have a sound knowledge of most formal specifications employed in the following industries:

- Telecommunications
- Offshore Oil & Gas
- Automotive
- Medical
- Power Generation
- Process Plant
- Transportation
- Water/Sewage Treatment

TECHNICAL PUBLICATIONS – Military & Commercial Continued ...

Technical Documentation can be prepared from manufacturer's drawings, specifications and data sheets, or from the system/equipment itself. Many clients employ their own in-house standard/specifications. Our flexible approach is such that we are quick to learn and adopt to standards as necessary, to meet the precise requirements of the client.
